Education

Central Michigan University **Mount Pleasant, MI**
Bachelor of Science in Computer Science; Major GPA: 3.65 *Jan. 2023 - May 2026*
- International President's Award Recipient

Experience

Central Michigan University **Aug. 2025 - Dec. 2025**
Grader - Computer Science Department *Mount Pleasant, MI*
- Maintained 98% grading accuracy for 50+ students using rigorous standardized rubrics.
- Performed 100+ logic reviews on Java/C code, identifying critical errors in 15% of projects.
- Delivered targeted feedback resulting in measurable improvements in class average scores.

Delta Dental of Michigan **July 2024 - Aug. 2024**
AppDev Intern *Lansing, MI*
- Implemented full-stack solutions using HTML, CSS, and SQL for internal application workflows.
- Modernized UI/UX design of legacy pages to improve navigation efficiency for end-users.
- Executed complex SQL queries to manage backend data and support critical internal reporting.

Dewpoint **May 2024 - June 2024**
Intern *Lansing, MI*
- Developed Power BI visualizations to transform complex datasets into actionable utilization insights.
- Created interactive heatmaps allowing leadership to visualize key performance areas and shift resources.
- Analyzed time-tracking data for 40+ employees to provide visibility into resource management.

Projects

KathhaVerse | https://www.kathhaverse.org/ | https://github.com/gsishir1104/kathha-verse **July 2026 - Sept. 2026**
• Built and deployed a full-stack beta-reading platform with writer, reader, and admin workspaces.
• Integrated OpenAI chapter analysis for relationships, locations, objects, events, and reader MCQs.
• Implemented Google OAuth, PostgreSQL persistence, email onboarding, and production deployment.

AI Resume Analyzer | *HTML, CSS, JavaScript* | https://ai-resume-analyzer-bay-nine.vercel.app **June 2026**
- Built a resume analyzer that generates job-match scores from resumes and job descriptions.
- Developed keyword detection to identify matched and missing skills.
- Created a 3-part feedback system with scoring, keyword analysis, and improvement suggestions.

Remnants | *Unity, C#, Python, Flask, REST API* | https://github.com/gsishir1104/Remnants **July 2026**
- Built a Unity narrative prototype with event-driven NPC behavior, persistent memories, and free-text dialogue.
- Connected Unity to a Python/Flask character service using validated JSON reactions and state updates.
- Designed rule-based safety guardrails to preserve character identity and prevent unsupported story details.

Rise of India | *Unity, C#* | https://gsishir1104.itch.io/rise-of-india **Nov. 2025 - Jan. 2026**
- Implemented complex gameplay mechanics including turn structures and hero card strategies.
- Developed challenge-based decision systems for an engaging educational experience.
- Integrated modular UI components to provide dynamic feedback on game state and player progress.

Technical Skills

Languages: Python, Java, C#, HTML/CSS
Tools & AI: Next.js, FastAPI, Flask, VS Code, GitHub, Supabase, Power BI, GenAI, Unity, Unreal Engine

Leadership & Campus Involvement

Adobe Collaboration Lab **April 2026 - May 2026**
Participant *Mount Pleasant, MI*
- Contributed to global research by providing usability insights on Adobe software to influence industry cycles.
- Analyzed UX design patterns in testing environments, delivering structured feedback to improve accessibility.

Adobe **Aug. 2025 - May 2026**
Ambassador *Mount Pleasant, MI*
- Mentored students in utilizing Adobe platforms to develop high-impact academic and creative projects.
- Collaborated with faculty to organize events that increased community engagement and creative output.

Chess Club, Central Michigan University **Jan. 2024 - May 2026**
Vice President *Mount Pleasant, MI*
- Organized inter-university chess tournaments and managed event planning logistics.
- Developed leadership and organizational skills through club administration.

Certifications

Project: Generative AI Applications with RAG and LangChain | *IBM / Coursera* **July 2026**
- Built a RAG application using LangChain, vector search, and a Gradio question-answering interface.
